

# Climate Bonds Standard & Certification Scheme

## Sector Criteria for Solar (version 2.1)

### Scope

*Sector-Specific Criteria* are approved by the Climate Bonds Standard Board following a criteria development process involving Technical Working Groups, Industry Working Groups and stakeholder consultation. Further details on the development process and the specific technical criteria are available from the Climate Bonds Initiative website.

This *Sector-Specific Criteria for Solar* is referred to in Part B and in Clause 10 of the Climate Bonds Standard (version 2.0). The technical criteria contained in this document must be met for relevant projects and assets to be considered eligible under the Climate Bonds Standard (version 2.0).

### Criteria for Eligible Projects & Assets – Solar

1. Eligible activities
  - 1.1. Eligible Project & Assets relating to solar energy generation shall be projects or assets that operate or are under construction to operate in one or more of the following activities:
    - 1.1.1. Onshore solar electricity generation facilities
    - 1.1.2. Wholly dedicated transmission infrastructure and other supporting infrastructure for onshore solar electricity generation facilities including inverters, transformers, energy storage systems and control systems.
    - 1.1.3. Onshore solar thermal facilities such as solar hot water systems.
2. Non-solar fuel use
  - 2.1. Eligible Project & Assets that have activities in solar electricity generation facilities or solar thermal facilities shall have a minimum of 85% of electricity generated from solar energy resources

### Assets and projects not eligible under the Solar Criteria

- 1.1. Not eligible Project & Assets relating to solar energy generation shall be projects or assets that operate or are under construction to operate in one or more of the following activities:
  - 1.1.1. Offshore solar electricity generation facilities
  - 1.1.2. Wholly dedicated transmission infrastructure and other supporting infrastructure for offshore solar electricity generation facilities including inverters, transformers, energy storage systems and control systems.
  - 1.1.3. Offshore solar thermal facilities such as solar hot water systems.

Note:

Offshore solar is eligible for Climate Bonds Certification under the [Marine Renewable Energy Criteria](#).

Disclaimer: The Climate Bonds Standard Board operates legally as an advisory committee of the Climate Bonds Initiative Board and oversees the development of the Climate Bonds Standard. Neither the Climate Bonds Standard Board nor any organisation, individual or other person forming part of, or representing, the Climate Bonds Standard Board (together, "CBSB") accepts or owes any duty, liability or responsibility of any kind whatsoever to any issuer which wishes to apply for any of its bonds to be certified under the Climate Bonds Certification Scheme ("Scheme"), or to any issuer whose bonds may at any time be certified under the Scheme or to any other person or body whatsoever, whether with respect to the award or withdrawal of any certification under the Scheme or otherwise. All advice or recommendations with respect to any certification under the Scheme or otherwise that CBSB provides to the Climate Bonds Initiative Board is provided to it in an advisory capacity only and is not to be treated as provided or offered to any other person.
